A person is using a Fiskars hand saw to cut a log in a forest. The saw has a silver handle and an orange blade. The person's hands are visible, holding the handle. The background is a blurred forest scene with green foliage. The text "Why is Fiskars #1 in cutting?" is overlaid on the image in white and orange font.

Why is
Fiskars
#1 in
cutting?

Founded in 1649, Fiskars' iconic heritage of creating highly aesthetic, intuitive tools makes us proud to be a world-renowned expert in two-blade cutting and manual hand tools for gardening enthusiasts all over the world.

Design philosophy

We submerge ourselves in segmentation studies, immersive consumer interviews and usability research to find ingenious ways to continually improve our products. As a result, we've won many awards, including the prestigious RedDot Best of the Best Design Awards.

Innovation

We've developed hundreds of patents and technologies to-date, all designed to help our tools outperform the competition and feel like a natural extension of your body.

Durability & quality

In addition to using only the highest quality materials, all of our products must pass rigorous lab testing before they can be distributed.

Global leader

Already known as the world's #1 brand in scissors, our gardening tools are also top sellers in Europe, North America, Australia and the Middle East.

Commitment

If gardening is happiness, Fiskars is committed to providing tools to help you find 100% happiness in the garden.

We be

Anvil or bypass?

BYPASS

Both blade and counter blade press into the wood to make clean cuts with less compression damage. In other words, the cutting blade bypasses the counter blade in a scissors-like fashion. This makes it possible to cut close to the stem, making bypass pruners ideal for cutting fresh wood.

ANVIL

The upper blade is forced through the wood with greater pressure as the anvil blade supports the branch, spreading pressure until the cut is complete. Anvil blades are ideal for cutting dry or dead wood.

Solid™ Pruners

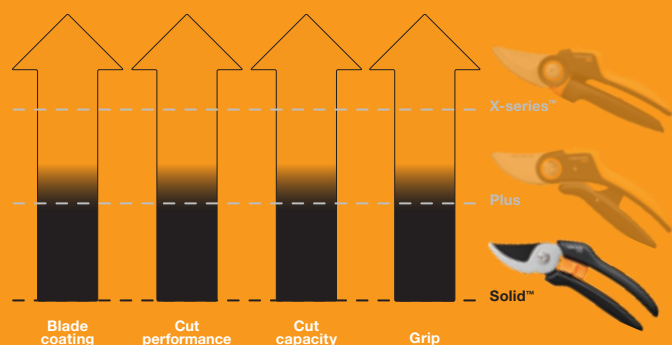

The “solid choice.”

Simple, effective and affordable with the quality Fiskars is known for. In short, these tools get the job done.

Features & benefits

- 1. Best-in-class cutting performance**
Hardened steel blades.
- 2. Blade capacity**
Ideal for small branches.
- 3. Blade coating**
PTFE coating for less friction.
- 4. Grip**
Suitable for both left- & right-handed use with comfortable durable handles.

Recycled Scissors

A pair of Fiskars scissors is lying on a mossy log in a forest. The scissors are made of recycled and 100% recyclable materials. The handles are made from an innovative biocomposite material consisting of 62% recycled post-consumer plastic and 38% cellulose fibre, a sustainable alternative to fossil-based materials. The blades themselves are also made of recycled stainless steel. The background is a blurred forest scene with green moss and brown leaves.

These Fiskars scissors were skillfully crafted from recycled and 100% recyclable materials at our factory in Billnäs, Finland. The scissors handles are made from an innovative biocomposite material consisting of 62% recycled post-consumer plastic and 38% cellulose fibre, a sustainable alternative to fossil-based materials. The blades themselves are also made of recycled stainless steel.

Despite being made of recycled materials, these scissors are designed to last - just like any of our other products.

StaySharp™

Fiskars StaySharp™ Max Reel Mower promotes greener, healthier lawns by cleanly cutting each blade of grass with a scissors-like action. This minimises the lawn's moisture loss, while reducing exposure to disease.

A reel mower lets you cut grass without noise, uncomfortable vibrations, or any of the hazards associated with power-driven rotary blades. It is one of the most environmentally-friendly ways to cut your lawn.

- StaySharp™ cutting system cuts without unwanted contact for long-lasting performance
- Precision-ground, hardened steel blades
- Ergonomic, height-adjustable handle with padded grip for more comfort
- Directs clippings away from your feet

Digging

To make digging as easy as possible, you need a reliable spade suitable for the task. That's why we've developed a variety of spades and shovels including spades for digging in hard soil, edging and planting, as well as light spades for soft soil. We also have shovels designed to move sand, soil and snow.

XACT™

Gardening is a demanding pastime. Fiskars Xact™ digging tools will give you that extra push to take your gardening to a whole new level and make digging a truly pleasurable experience. Fiskars Xact digging tools fit you – combining the right length with lightweight material and durability.

SMARTFIT™

This range of telescopic tools have an adjustable shaft length which extends from 1050 mm to 1250 mm. The spades, shovels and forks can be comfortably used at a range of heights. The welded connection between the blade and the shaft ensures rigid durability and longevity while its boron steel construction adds extra strength.

ERGONOMIC™

Beautifully designed and realised, Fiskars Ergonomic™ is a perfect selection of tools for digging and composting – all for the most discerning gardener. The spades, shovels and forks have angled shafts and handles for reduced strain on backs, hands and wrists. A resin coating on the shafts also maximise grip and comfort.

WHITE

The new beautiful White range offers you a selection of lightweight tools for planting, cultivating, raking and other gardening tasks. Fiskars versatile range of soil rakes, hoes and cultivators are ideal for weed control, moving soil, creating narrow furrows for planting seeds and bulbs and even harvesting root crops.

A person is using a chainsaw to cut a large tree trunk in a forest. The person is in the background, slightly out of focus, wearing a light-colored shirt and dark pants. The chainsaw is in the foreground, cutting into the tree trunk. The tree trunk is thick and has a rough, textured bark. The background is a lush green forest with many trees and foliage.

Norden Axes

With Norden axes, Fiskars returns to its deep roots. The finest hickory is used to craft a handle with the authentic and natural feel of the traditional wooden axes. Yet as with all its axes, Fiskars always insists on the highest possible performance. After thorough testing, you can be sure that the blade will always stay attached, while enjoying unparalleled performance, endurance and durability.

Fiskars Norden.
Pure performance.

X-series™ Axes

Fiskars next-generation splitting axes are a true evolution of craftsmanship, purposefully designed for one-strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

KEY BENEFITS

- ✓ 35 degree convex cutting bevel angle for splitting axes - the convex shape strengthens the edge to make it less sensitive to fracture
- ✓ Perfect balance between head and shaft for the most safe, comfortable and efficient swing
- ✓ Ultralight and durable FiberComp™ shaft minimizes fatigue and makes the axe virtually unbreakable
- ✓ Optimal anti-shock surface structure ensures a comfortable, firm grip
- ✓ Hooked end of the handle prevents the axe from slipping out of the hand
- ✓ Comes with a plastic sheath for easy carrying and storage

Chopping vs. splitting

Chopping axes

Fiskars next-generation chopping axes serve all manners of woodwork, chopping, carpentry and pruning. The range delivers a wonderful package of minimalist design and sharp-edged functionality with the right fit for all wood preparation tasks. Pick your size according to the task at hand.

The Universal Chopping Axe's thin, wide edge ensures a clean, easy cut in fresh, resinous wood, like spruce or pine.

Splitting axes

Fiskars next-generation splitting axes are a true evolution of craftsmanship –purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

The Splitting Axe features a unique cutting edge that easily slices into the wood, which the thick axe blade then pushes apart.

Choose the right size for you

1. LENGTH TEST

Grab the axe on the shaft below the blade. Turn the shaft towards your armpit. If the end of the shaft reaches your armpit, the axe is too long.

2. WEIGHT TEST

Grab the axe at the end of the shaft and let the head rest towards the ground. Lift the head up while turning your wrist close to your body. The axe should be vertical in your hand by the end of this movement. If you can't lift the axe this way, the axe is too heavy.

Saws

To make sawing as easy as possible, you need a reliable saw that is up to the task. We have a variety of saws ranging from saws that cut stems and thicker branches to saws with curved noses for cutting in hard-to-reach or difficult positions.

Xtract™ Saws

Fiskars Xtract™ saws feature a unique, retractable mechanism and include an integrated belt clip for safe and easy transport and storage. Hardened steel blades ensure a long lifetime of sharpness, while a SoftGrip™ handle with finger guard ensures a safe grip.

Fixed blade saws

Fiskars fixed blade saws feature a highly efficient tooth profile for fast, accurate sawing. Impulse-hardened blades stay sharper longer, while a SoftGrip™ ergonomic curved handle with finger guard ensures a safe and comfortable grip.

Bow Saws

Fiskars bow saws are excellent for sawing stems and thicker branches. A curved nose enables cutting in hard-to-reach or difficult positions. Bow saws also cut on both the push and pull stroke for efficient sawing.

Saws

Fiskars saws have teeth designed especially for wood. They allow you to prune branches and clear foliage in difficult positions safely with a lightweight saw. Fiskars Xtract™ range features a unique retractable mechanism and integrated belt clip making them safe to carry and easy to store.
